Sample program

```

<html>
<head>
<title>Learning Process
</title>

```

```
</head>

<body>

<u><h1 align="center"> HTML Introduction</h1></u>

<i><h2 align="left">Processing</h2></i>

<small><p>Definition-HTML TAG

This basically defines the document as web page. It also identifies the beginning and end
of the HTML document. All other tags must fall between the html tags.

<br>

<u>Header Tag</u>

The header contains information about the document that will not appear on the actual
page, such as the title of the document, the author, which stylesheet to use and also
meta tags.

<br>

<u>Title Tag</u>

The title tag defines the title that will appear in the title bar of your web browser. The title
must appear between the head tags.

<br>

<U>Body Tag</u>

The body tags contain all the information and other visible content on the page. All your
images, links and plain text must go between the <body> and </body> tags.

</p>
